Underarm Waxing

Underarm waxing involves the removal of hair from the underarm area using warm wax. This method pulls hair out from the root, providing smoother skin that lasts longer than shaving. The process includes cleansing the area, applying wax, and quickly removing it to pull out the hair. This service can help reduce hair growth over time and often leaves the skin feeling softer.

Facial

A facial is a skincare treatment that involves multiple steps to cleanse, exfoliate, and nourish the skin. The process usually includes steaming, extracting impurities, applying masks, and massaging the face to improve circulation. Facials are designed to rejuvenate the skin, reduce signs of aging, and provide a healthy, glowing complexion. Different types of facials are available to address specific skin concerns such as acne, dryness, or sensitivity.

Microblading

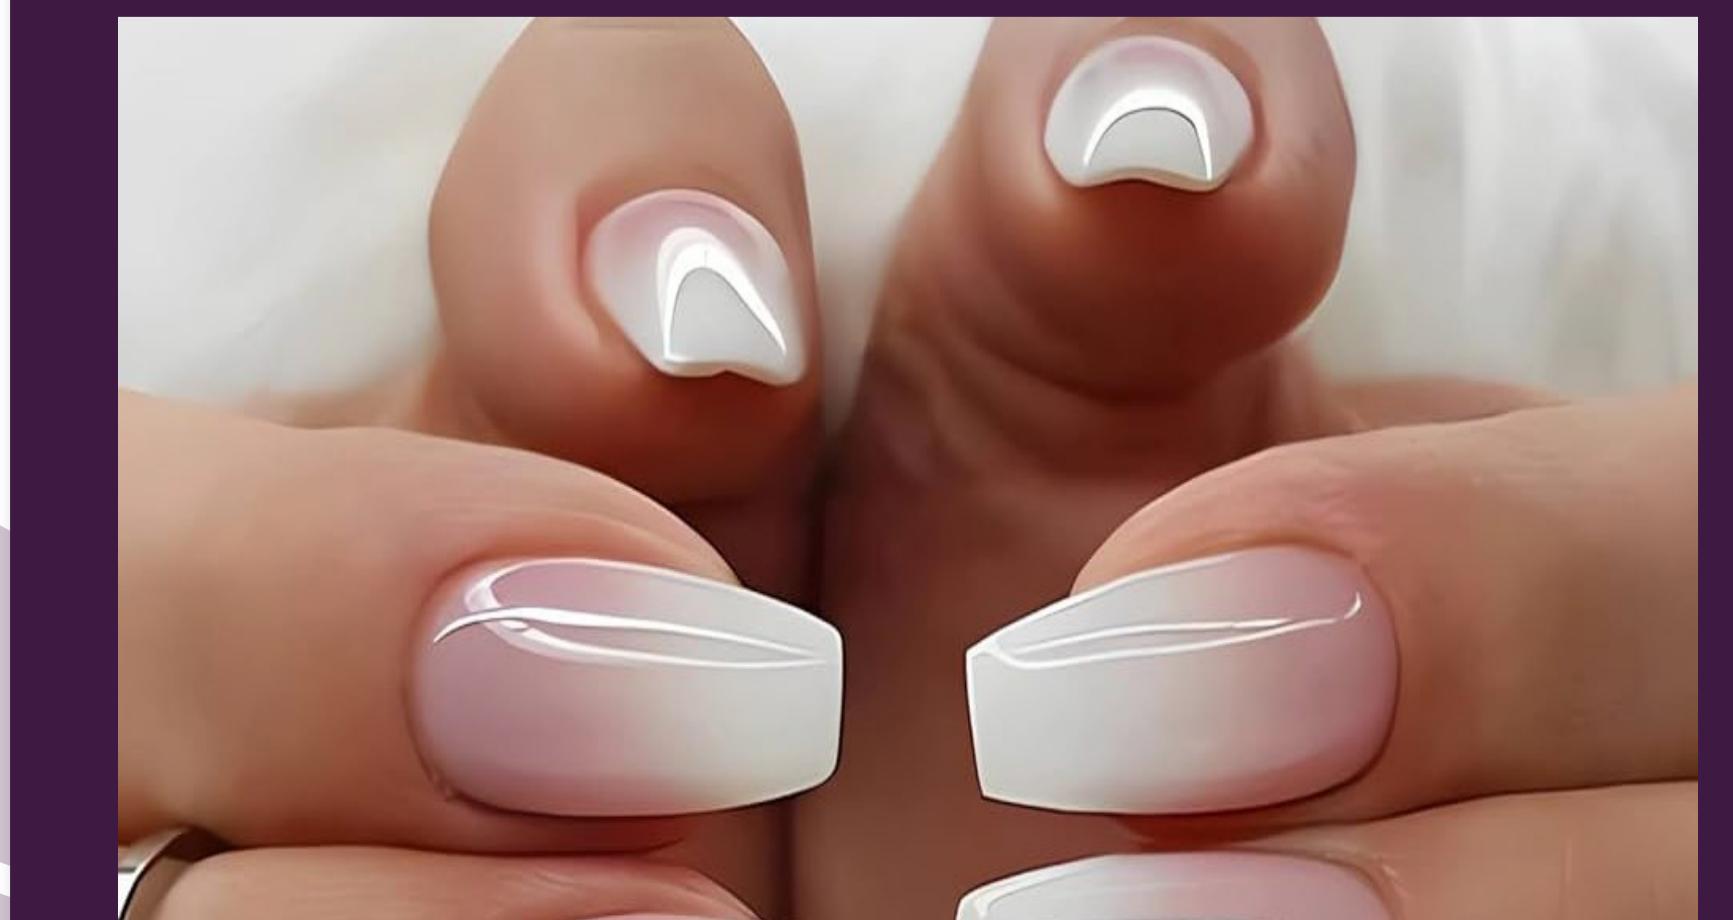

Half-body waxing

Half-body waxing typically covers the upper or lower half of the body, depending on the client's preference. It includes areas such as the arms, legs, chest, or back. The process involves applying

Nails

Nail services typically include manicures and pedicures, which involve the grooming and polishing of fingernails and toenails. Manicures often include nail shaping, cuticle care, hand massage, and the application of nail polish or enhancements like

Microblading is a semi-permanent cosmetic procedure that enhances the appearance of eyebrows. It involves using a fine blade to deposit pigment into the skin, creating hair-like strokes that mimic the natural brow hairs. This technique provides fuller, more defined eyebrows that last up to two years. Microblading is ideal for individuals with sparse or thin eyebrows and those looking for a natural look.
